

Our Storm Door Features:

Whether you prefer a traditional, contemporary, elegant, or informal look, there is a Seal-Rite style and color that's just right for you. Years of testing and product refinement have gone into the development of the Seal-Rite Storm door. For strength and beauty no other storm door comes close. Here are some key features that make our storm door stand apart from the competition!

1 Heliarc-Welded Corners

Our **Heliarc-Welded Corners** are the foundation of every Seal-Rite Storm Door. Unlike conventional doors with screw-type corners, Seal-Rite's corners are the strongest spots on the door, giving you maximum strength and durability.

2 Interlocking Hinge System

Our **Exclusive Interlocking-Hinge System** is "guaranteed not to fail!" Our four-hinge tubular design interlocks into the door frame. It eliminates any tendency of the door to pull away from the frame, which traditional hinges don't prevent. Bronze bushings, held in place with heavy steel pins, provide extra durability. This hinge system is so strong that it has been tested to withstand **over 600 lbs of torque and the door still swings without binding!** Above you can see the "Hinge Killer" test!

3 Brush-Type Weather Seal

Our **Brush-Type, Adjustable-Bottom Weather Seal** is similar to the type of weather seal found on many commercial doors. With its non-shrink design, it won't bind, twist or tear as most traditional vinyl sweeps do. It costs us a little more, but it's worth it!

4 Wind Strap Our Fold-Back Wind Strap

replaces the bother-some, noisy chains found on most doors.

5 Door Screen Tension Clips

Our **Door Screen Tension Clips**

Tension Clips

provide all the strength needed to keep your screen from bowing and getting baggy. Most competitors use screen bars across the center of the door which results in an obstructed view!

6 Mortise Lock

Our **Mortise Lock**

offers superior strength and security. Our Mortise Lock is offered in Brass and Satin Nickel finishes.

7 Adjustable Hydraulic Closer

Our **Adjustable Hydraulic Closer** will provide you with many years of smooth, non-jarring closing action. Most other products are air closers that often times run out of air before the door is fully closed.
